DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 6, 2002 has been entered.

Drawings

2. The proposed substitute sheets of drawings, filed on September 6, 2002 have been approved.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claim 33 is rejected under 35 U.S.C. 102(e) as being anticipated by US patent No. 6,162,686 to Huang et al.

Huang et al. teaches a semiconductor device comprising:

a first insulating film (24, 30) formed on a substrate;

a first conductor (26, 38B) on the substrate and extending through the first insulating film;

a first upper wire (58B) on first insulating film and first conductor; and

a second insulating film (66) on the first upper wire, wherein the second insulating film includes a thin area that can be used for guiding a laser.

Allowable Subject Matter

5. Claims 1, 2, 5 – 23, 30 – 32, 34, 36 – 42 and 44 are allowed.
6. Claims 35 and 43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach a semiconductor device wherein the first conductor has a first portion made of a first material and a second portion made of material different from the first material (Figs. 11B, 11C, 12B, 12C).

Response to Arguments

8. Applicant's arguments filed September 6, 2002 have been fully considered but they are not persuasive. The applicant argues that Huang et al. does not teach a

semiconductive substrate. See Col. 5, lines 37 – 45, where Huang et al. disclose that the substrate is a semiconductive material, such as silicon.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas W Owens whose telephone number is 703-308-6167. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on 703-308-2772. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
